

PATIENTS RIGHTS AND RESPONSIBILITIES

- Excellent medical care and treatment without regard to race, color, sex, sexual preference, sexual orientation, national origin, handicap or source of payment.
- Good care and high professional standards that are continuously maintained and reviewed.
- A surrogate (parent, legal guardian, person with medical power of attorney) exercise the Patient Rights when you are unable to do so, without coercion, discrimination or retaliation.,
- Confidential records that protect your protected health information; you have the right to approve or refuse the release of clinical records.
- Good health care management techniques that make the most effective use of your time and still provide for your comfort and convenience.
- Information concerning your physician, diagnosis, treatment and prognosis, to the degree known. Know the reason for a transfer inside and outside the facility.
- Information concerning physician ownership in the facility: Dr. Curt Young owns this facility.
- High degree of privacy. Case discussions, consultations, examinations and treatment plans are confidential and will be conducted discreetly.
- Make decisions about medical care, including the right to accept or refuse medical or surgical treatment after being adequately informed of the benefits, risks and alternatives, without coercion, discrimination or retaliation.
- Competent, caring healthcare providers who act as your advocates and treats your pain as effectively as possible. Care is provided in a language that you understand.
- Refuse any particular procedure or treatment. Refuse to participate in experimental research.
- Examine and receive a detailed explanation of your bill.
- File a grievance with the facility by contacting the Director of Nursing, via telephone or in writing, when you feel your rights have been violated.
